

CMa35

USB Optical eye

The CMa35 is an optical eye for mobile readout and configuration of any meter with serial optical interface on the market. The manufacturer and software independent design makes the CMa35 the perfect choice for mobile readouts.

EASY TO USE

The CMa35 is ideal for mobile readout and configuration of meters with serial optical interface. The CMa35 is easy to mount on the meter with its integrated magnet. The detachable mini USB cable saves space and helps avoid cable mess. It is easy to extend the cable length by replacing the cable with a longer one.

FLEXIBLE

The CMa35 is manufacturer independent and can be used with any meter with serial optical interface on the market. The CMa35 can be used with any meter configuration software using serial communication. When the CMa35 is connected to a computer, a serial port will be added.

Mechanics

Material	Delrin
Dimensions	Diameter=32 mm, height=13 mm
Weight	83 g (cable included)
Mounting	On any meter with serial optical interface
Cable	2 m

Connections and interface

Connection	USB
------------	-----

Electrical

Power supply	From USB interface (5 V)
Supply current	Max 16 mA

Other

Transmission speed	300-9600 baud (half duplex)
Optical characteristics	EN 61107
